

SIGNIFICANT ENVIRONMENTAL ASPECT & IMPACT

Aspect
HAZMAT Usage

Impact
HAZWASTE Generation

OUR GOAL

REDUCE OUR HAZARDOUS WASTE OUTPUT TO BECOME A SMALL QUANTITY GENERATOR BY FY2015

HOW WE CAN MEET OUR GOAL

VOLUME REDUCTION — Assess how much is needed to do the job and right-size

EXPIRATION — Order only what can be consumed in a reasonable amount of time.

Always consider shelf life before accepting a product

CHEMICAL SUBSTITUTION — Research a more environmentally friendly product. Alternatives may exist.

RECONSIDERATION — Is there a safer way of doing a job or process?

CHANGE — Waste reduction requires behavioral and attitude changes by all employees

THE PATH TO HAZARDOUS WASTE REDUCTION IS BY WAY OF REDUCING THE CONSUMPTION OF HAZARDOUS MATERIALS

MEASURES WE HAVE TAKEN SINCE 2011

- Centralized the purchasing of chemicals through the base HAZ-Mart
- Fully implemented the use of Environmental Enterprise Safety Occupational Health—Management Information System (EESOH-MIS)
- Hazardous Material Management Program (HMMP) Team oversight for all additions and new process authorizations

WE HAVE BEEN A LARGE QUANTITY GENERATOR SINCE 1986
